About the artwork

This artwork is a three-panel C-print, face-mounted on 4mm acrylic glass, backed with aluminum. Ready to hang. Different sizes are available. (45" X 90" & 54" X 108")

Temporal Perception is a series of photographic triptychs that explore the fleeting nature of visual memory. Each work begins with a photograph, paired with a second panel composed of color fields sampled directly from it. At first glance, the diptychs appear as a single unified composition, where colors and geometric lines form a cohesive whole.
